Improve safety performance with Assettagged.com

All health & safety professionals appreciate that keeping track of safety critical assets is key. One of the biggest challenges for industry is managing multiple assets that are used daily across multiple sites. Work inspections, service, maintenance, repair and condition reports are all vital, but the effective recording and management of assets has been a real challenge until now.

Our powerful platform uses QR codes to allow you and your team to instantly update work equipment status using your mobile, it's easy to use; reliable, secure and scalable to meet the needs of your business.

What is Assettagged.com?

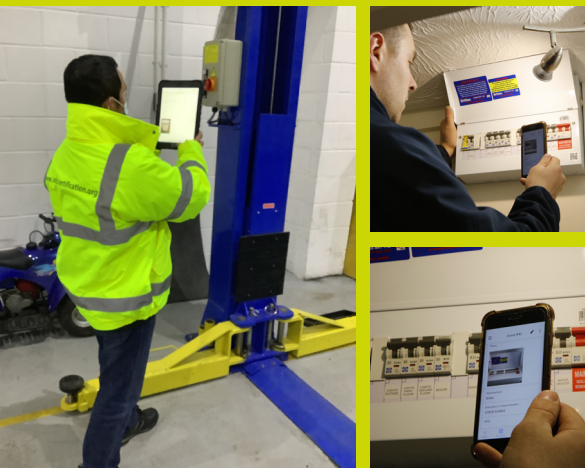

Assettagged is an innovative cloud based platform that enables traceability, visibility and accessibility of safety critical assets using QR codes and high impact asset tags to help streamline safety audits and improve reporting.

With Assettagged.com you can:-

- Access and locate work equipment.
- Create your own customisable checklists.
- Enable accident, incident and near miss reporting.
- Access risk assessments, CoSHH data sheets, training, calibration, service, maintenance, test and inspection records on the go.
- Share asset information with insurers and third parties.

Assettagged.com - benefits at a glance

- Easy inspection planning complete with automated reminder emails.
- Fully customisable work equipment inspections.
- Visual inspections on-the-move using your mobile device and own company templates.
- Auto-generate QR codes that do away with paper-based records.
- Effective reporting and audit tools to help manage compliance and risk.
- Assign tasks to team members and track actions.
